PROFESSIONAL SUMMARY

AI and Data Science undergraduate with hands-on experience in machine learning, statistical modeling, and business intelligence. Proficient in Python, SQL, Power BI, and PostgreSQL with a proven ability to extract actionable insights from complex datasets. Built deep learning models achieving 95% classification accuracy. Seeking to contribute technical expertise and problem-solving skills in a results-driven, data-focused organization.

TECHNICAL SKILLS

Programming Languages: Python, SQL, HTML
Data Analysis & Visualization: Microsoft Power BI, DAX, Tableau, Microsoft Excel
Machine Learning: LSTM Networks, Model Evaluation, Data Preprocessing
Database: PostgreSQL
Design Tools: Django, Figma
Soft Skills: Data Analysis, Problem Solving, Critical Thinking, Team Collaboration

PROFESSIONAL EXPERIENCE

Machine Learning Intern Sep 2023 – Oct 2023
Kodacy | Remote

- Completed a 30-day virtual internship at an AI-focused platform, gaining exposure to end-to-end ML project workflows.
- Implemented supervised and unsupervised learning algorithms, applying them to structured datasets for classification and regression tasks.
- Performed data preprocessing, feature engineering, and model evaluation to optimize prediction performance.
- Validated trained models using cross-validation techniques, achieving measurable improvements in accuracy through iterative tuning.

PROJECTS

HR Analytics Dashboard | Power BI, Excel

- Built an interactive dashboard in Power BI to visualize workforce metrics including attrition rates, headcount trends, and performance indicators. Converted raw HR records into structured visual reports, enabling leadership to make evidence-based decisions.

Fake News Detection System | Python, LSTM, NLP

- Engineered a deep learning classifier using Long Short-Term Memory (LSTM) networks to identify and flag misleading news articles. Applied natural language processing for text vectorization and achieved 95% classification accuracy on the test dataset.

Planet Pulse – Sustainable Product Design | Python, Data Analytics

- Conducted market research and applied analytical techniques to support the design of eco-friendly water bottles. Used trend analysis to identify consumer preferences and align product specifications with environmental sustainability standards.

Adventure Works Sales & BI Report | Power BI, DAX, Data Modeling, KPI Analytics

- Built a 7-page interactive Power BI report tracking Total Revenue, Profit, Orders, and Return Rate using 10+ DAX measures, customer segmentation by Income Level and Occupation, Decomposition Tree, and Key Influencers visuals with dynamic slicers and star schema data modeling.

REBOOK – Book & Notes Exchange Platform | React.js, Supabase, PostgreSQL, TypeScript

- Developed a full-stack web application for book and notes exchange with secure Supabase Auth, Row Level Security (RLS) for user data isolation, and real-time database operations for seamless user experience.

EDUCATION

B.Tech - Artificial Intelligence and Data Science 2022 - 2026
DMI College of Engineering | Chennai

Higher Secondary Certificate (HSC) 2022
St. John's Matric Higher Secondary School |67% | Porur

Secondary School Certificate (SSC*)* 2020
St. John's Matric Higher Secondary School |58% | Porur

CERTIFICATIONS

- ChatGPT for Data Analysis
- PostgreSQL
- Basic Python Programming - MSME
- Quantum Computing – IBM

LANGUAGES

English (Professional), Tamil (Native)
